Eager to Learn

Muhammad Daniyal

About me

Enthusiastic developer with experience in modern web technologies, including the MERN stack, Reactjs and NEXT.js. Focused on creating effective solutions and contributing to innovative projects. Skilled in problem solving and committed to continuous learning.

Projects

Neon-Nexus(AI Web Auction Platform)

As a Fyp (Developed a full-stack Next.js auction platform with Supabase storage, Cloudinary for images, and Clerk auth. Features include AI-assisted product uploads (Copilot), real-time bidding (higher bids only), Google Pay checkout, and an Amazon search agent for live product comparisons. Includes admin/user dashboards and Google Vision AI for image tagging)

PSL Runs Predictor (Machine Learning)

PSL Win/Runs Predictor – ML model (XGBoost) to forecast match results & scores using PSL historical data.

Ai Image Generator

Developed an AI image generator using Next.js, Hugging Face models, and Supabase. Features dynamic themes, model fallback, and Cloudinary storage

Open-Source LLM Chatbot

Built a Streamlit-based AI chatbot using Ollama's LLaMA model, featuring real-time response streaming and local hosting.

Certificates

- Introduction to Front-End development by Meta
- Advanced Nextjs Concepts by codedamn
- HTML and CSS:Introduction to Frontend Web Development by Udemy

All other projects and certificates are displayed on
